

| | |
|-------------------------------|---|
| Cloud Connect | Connect your Xstream Witness System to the cloud and login to your Xstream Witness system from anywhere, anytime, on any device |
| Share Access | Quickly share access to any system connected to Xstream Cloud with anyone using their email address and custom user roles |
| Unlimited Systems | Connect an unlimited number of systems to a single account for managed services or large enterprise customers |
| Web Viewing | View live or recorded video from any camera connected to any cloud-connected system without the need to install anything |
| Secure & Encrypted | Xstream Cloud undergoes continual security testing and uses the latest encryption technologies to secure user data |
| Cloud API | Xstream Cloud has an API that allows integration to 3rd party Internet-connected systems – like Zapier (https://zapier.com) |

Scalability

Xstream Cloud Services

| | |
|------------------------|--|
| Cloud Connect | Connect any Xstream Witness System to Xstream Cloud for simple remote connectivity from anywhere using Xstream NAT Traversal and Cloud Data Proxy technology. |
| User Management | <p>Add an unlimited number of users to a single Xstream Cloud System.</p> <p>Share access to your Xstream Witness System in seconds using only email addresses.</p> <p>Create Custom Roles to quickly assign access to multiple Xstream Cloud connected Systems.</p> |
| How It Works | Xstream Witness applications Xstream Server, Xstream Desktop, Xstream Mobile connect via an active Internet connection to the Xstream Cloud service and are automatically connected together using a combination of NAT Traversal direct connection and data proxy connected via Xstream Cloud technologies. |

Xstream Cloud Features

| | |
|-----------------------|--|
| Connectivity | <p>NAT traversal: connect directly to proxied Xstream witness servers.</p> <p>Clouddataprox: connect via aws cloud proxy service</p> |
| Interface Tabs | <p>Systems: view connected system tiles</p> <p>Settings: view users rename system, disconnect system</p> <p>View: use Xstream cloud client to view live or recorded video</p> |
| Security | <p>Secure password recovery: via email</p> <p>Https: openssl encrypted server/client/cloud connections</p> <p>Email: tls (transport layer security)</p> <p>Passwords: complex multi-level hash</p> |

Connect

NAT Traversal
Data Proxy via AWS
Simple Credentials
Encrypted Communications
Wifi/LAN/WAN
4G/LTE/Data
